

SIDDHANT BANSODE

Full-stack developer (Java, Spring Boot, React.js, Node.js)

📞 9011012608 ✉ theroyalsquad92@gmail.com 📧 siddhant-bansod-e-04a566302 📍 Pune

PROFESSIONAL SUMMARY

Full-stack developer graduating in June 2026 with an **8.10 CGPA** in **B.Tech in Information Technology**. Proficient in **Java, C++, Scala**, and **Python**, with hands-on experience from projects in AI-assisted fraud detection and image-based nutrition analysis. Developed applications that enhanced user engagement and operational efficiency.

WORK EXPERIENCES

Software Development Intern

Feb 2026 - Mar 2026

Cognifyz Technologies

- Optimized core Java routines for an internal application module, overseeing the process from requirements analysis to implementation and testing.
- Collaborated within a 4-engineer agile team, participating in daily stand-ups and sprint reviews to ensure timely delivery of assigned features.
- Diagnosed front-end performance bottlenecks in a React.js interface and implemented targeted rendering optimizations under the guidance of a senior engineer.

Technologies / Skills Used : Java, React.js

Development Intern

Apr 2026 - Jun 2026

CodeTech

- Participated in the full software development lifecycle, focusing on feature development, code refactoring, and cross-browser debugging.
- Developed and tested backend API endpoints, enhancing request-handling reliability and scalability under load.

Technologies / Skills Used : Node.js, Express.js, React, Express, MongoDB, Tailwind CSS

EDUCATIONS

Dr. D. Y. Patil University | Pune

Aug 2022 - Jun 2026

B.Tech in Information Technology

CGPA : 8.10/10

PROJECTS

NutriScan AI |  Github

2026 - Present

Group Project

- Collaborated in a cross-functional team to develop a system that parses food images and generates nutrition analysis profiles using a machine learning backend model.
- Constructed the image-processing pipeline that supplies classified food data to the nutrition analysis module.

Technologies / Tools Used : python, pytorch, CNN

AI-Based UPI Fraud Detection System |  Github

Jan 2026 - Mar 2026

- Designed a behavioral transaction-analysis workflow to flag anomalies and evaluate real-time transaction frequency patterns.
- Developed logic to isolate suspicious transaction patterns within digital payment flows for further review.

Technologies / Tools Used : python, pytorch, CNN

Expense Tracker |  Github

2026 - Present

- Developed a full-stack expense-tracking application using React.js, Node.js, and MongoDB, enabling users to log income and expenses by category.
- Created category-based filtering and summary reports, allowing users to view clear spending breakdowns across custom date ranges.
- Designed the MongoDB schema and REST API endpoints, facilitating full CRUD operations on transactions from the React front end.

Technologies / Tools Used : python, pytorch, CNN

Aaru's Diary Coffee Shop

Jul 2025 - Present

E-Commerce Application

- Developed a responsive React.js web application for an e-commerce platform, featuring user login, a dynamic menu with 12 products, and an interactive cart sidebar.
- Implemented client-side billing logic to calculate order totals in real time as items were added to the cart.

Technologies / Tools Used : React, Node.js, Express, MongoDB, Tailwind CSS

SKILLS

Databases :	MongoDB, MySQL
Frameworks & Libraries :	React.js, Bootstrap, Node.js, Express.js, Spring Boot, Tailwind CSS
Languages :	English, Hindi, Marathi
Programming Languages :	Java, JavaScript, C, SQL, C++, Scala, Python
Soft Skills :	Object-Oriented Programming, Data Structures & Algorithms, Communication, Problem Solving, Leadership
Tools & Platforms :	Git, GitHub, Postman

HACKATHONS & LANGUAGES

- Participated in a hackathon, designing and pitching a concept for a Government Medical Emergency Services Platform aimed at reducing emergency response deployment time.
- Languages: English (Proficient), Hindi (Proficient), Marathi (Native)
